Monica:
 I do not see a telephone number form (b) (6) Please pass that information on to me.
 Thanks

Hi Susan and Gary,
 Would y'all be able to call (b) (6) back this week regarding her questions since you now have sample results?
 Please let me know-thanks!
 Monica

 I just spoke with (b) (6) She was calling on behalf of one of the residents that had complained about the release last week. She re-iterated the following questions that she would like us to follow-up on (basically the same as were conveyed to Nicole):

1. What are the results from the samples that were collected and who collected? They were told the results would be in today – I explained that both EPA and City of Houston had collected samples, but the TCEQ had not and that I did not know exactly what samples each agency had collected.
2. What are the health concerns from the material– She seemed to understand that we cannot comment on this without the results. I asked if she was referring to the material released last week and she said yes.
3. What cleanup will be conducted in the neighborhood and at the facility and who will be responsible for the cleanup?

I told her we would gather information on her questions and get back with her later in the week. I also gave her my direct number.
